Professional Summary

Highly motivated Cybersecurity Analyst with hands-on experience in penetration testing, vulnerability assessment, and network defense. Proficient in leveraging security tools, scripting, and threat intelligence and incident response. Proven ability to enhance antivirus capability by implementing a Model Context Protocol that generates precise Yara rules, demonstrating a commitment to applying cutting-edge cybersecurity practices.

Technical Skills

Security Operations Center (SOC), Threat Intelligence, Risk Management, Penetration Testing, Vulnerability Assessment, Digital Forensics, Cryptography, MITRE ATT&CK, Metasploit, Wireshark, Nmap, Burp Suite, ClamAV, OWASP ZAP. Python (Scapy, Pandas, Socket), Bash, PowerShell.

Experience

Cybersecurity Training | **National Cyber Security Centre of Jordan** | *July 2025 – Present*

Completed intensive training covering business soft skills and cybersecurity technical domains including basics, cryptography, scripting, offensive, defensive, and Azure cloud security.

Projects

Model Context Protocol (MCP) for Antivirus Enhancement | *Mar 2025 - Jun 2025*

Engineered a high-performance system to enhance antivirus capability by implementing a Model Context Protocol that automates malware sample analysis and generates precise Yara rules for enhanced threat detection, which Optimized rule selection, resulting in a 30% reduction in ClamAV scan time for known threat families.

Intrusion Detection System (IDS)

| Oct 2024 - Dec 2024

Developed custom Intrusion Detection System (IDS) to perform real-time network traffic analysis and detect suspicious activity.

Capstone project

| Oct 2025 – Nov 2025

Engineered a full-stack system environment containing three known Common Vulnerabilities and Exposures (**CVEs**) to simulate a real-world attack surface. * Successfully exploited the identified CVEs using advanced **penetration testing** techniques to demonstrate attack vectors and potential impact. * Developed and implemented comprehensive remediation strategies, including patching, configuration hardening, and **Intrusion Prevention System (IPS)** rules, to secure the system.

Education

Bachelor of Cybersecurity | Al Zaytoonah University of Jordan Oct 2021 - Jan 2025 * **Relevant Coursework:** Network Security, Operating Systems & Security, Cryptography, Computer Networks, Software Security.

Certifications

- **CEH v13** (April 2025)
- **Certified in Cybersecurity (CC)** from ISC2 (March 2025)
- **Cisco Certified Network Associate (CCNA)** (November 2024)
- *In Progress:* SOC Analyst Learning Path (LetsDefend).

Volunteer Experience

- **Leadership & Technical Support:** Mentored new IT students, organized technical workshops, seminars, and hackathons (Item_ZUJ, IEEE ZUJ Section).
- **Civic & Professional Development:** Engaged in leadership training and developed teamwork/public speaking skills (Ana Usharik Program, USAID).
